ONE WORLD LITHIUM ANNOUNCES ENGAGEMENT OF JACK LIFTON LLC

VANCOUVER, BC – October 07, 2021 - One World Lithium Inc. (CSE-OWLI) (OTCQB-OWRDF) (the “Company”) (“OWL”) is pleased to announce that it has signed a consultant agreement with Jack Lifton LLC (“Jack”) on October 6, 2021. As a consultant he will advise OWL on its business model with emphasis on being both a potential lithium producer and a green technology provider for the lithium industry.

Initially, as a physical chemist, where he specialized in ultrapurification of rare metals and their chemical compounds and alloys for use in solid state electronic and energy storage. During those first years he worked on rare earths, lithium and sodium based molten salt battery development, including a period of time at Ford Motor Company’s scientific laboratory, and the ultrapurification of high temperature metal and their salts for use as substrates in semiconductor electronics and electro - optics. He then became an executive in in a company manufacturing engineered materials for the OEM automotive industry.

Jack also specialized in the development and testing of technologies for selectively extracting individual chemical elements from natural and man-made mixtures and then ultrapurifying them for use in electronics and catalysts. This led him to become CEO for two large firms that specialized in chemical manufacturing as well as he second firm also specializing in chemical manufacturing. After retiring from manufacturing, Jack became a sector analyst specializing in rare metals mining, refining and fabrication for end-users. He has written and lectured extensively about the “technology metals”, a term he coined to describe those metals whose electronic properties enable the miniaturization of electronic technologies.

Jack also does business operations consulting to technology metals based ventures, speaks at conferences, and is the editor and co-publisher of Investorintel.com, a web-based information source for investors in technologies, raw materials, and process engineering advances.

The Agreement is for a one year period. The Consultant will be paid a monthly fee of \$3,000 US and will have an option to purchase up to 1,000,000 common shares of the Company at an exercise price \$0.065 per common share vesting from time to time. All Stock Options were granted in accordance with the Company’s stock option plan.

Doug Fulcher, OWL’s President and CEO mentioned “Our Company is looking forward to Jack’s advice as it will advance both our mineral exploration programs and create real credibility for its potential extraction technology”.

Forward-Looking Information: This press release may include forward looking information within the meaning of Canadian securities legislation. Forward looking information is based on certain key expectations and assumptions made by the management of the OWL, including the intention of OWL to proceed with the advancement of the Property or with the Separation Technology. Although OWL believes that the expectations and assumptions on which such forward looking information is based are reasonable, undue reliance should not be placed on the forward-looking information because OWL can give no assurance that they will prove to be correct. Forward looking statements contained in this press release are made as of the date of this press release. OWL disclaims any intent or obligation to update publically any forward-looking information, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws. There can be no assurance that such statements will prove to be accurate and actual results and future events could differ materially from the those anticipated in such statements, important factors that could cause actual results to differ materially from the company's expectations include: (I) inability of OWL to execute its business plan and raise the required financing (II) accuracy of mineral or resource exploration activity (III) continued access to mineral property (IV) risks and market fluctuations common to the mining industry and lithium sector in particular and (V) advancements in new separation technologies. The reader is cautioned that assumptions used in the preparation of any forward-looking information may prove to be incorrect. Events or circumstances may cause actual results to differ materially from those predicted, as a result of numerous known and unknown risks, uncertainties, and other factors, some of which are beyond the control of the OWL. The reader is cautioned not to place undue reliance on any forward-looking information contained in this press release.

Neither the Canadian Securities Exchange nor its Market Regulator (as that term is defined in the policies of the Canadian Securities Exchange) accepts responsibility for the adequacy or accuracy of this release.
